***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15, 17-19, 32-38 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyazawa et al. (6,070,139).

As to claim 15, Miyazawa teaches a remote user terminal, comprising:

Standard speech feature data storage means;

Conversion means configured to compare the standard feature data with speaker's speech features and based on the result generates a conversion/modification rule/function;

And a communication interface for sending the function to a speech recognition processor (Col.2, line 58-Col.3, line16).

Its noticed that Miyazawa generates the function to modify the features, while its claimed selecting a function.

Official Notice is taken that selecting a function instead of generating one is common practice in the art and it would have been obvious to one of ordinary skill in the art in order to avoid the time required to generate the function.

As to claim 17-19, Miyazawa teaches parameters that correspond to different circumstances for use by the modification function (conversion rule) generator (Col.3, lines 5-15).

Claims 32-38 and 49 are analogous to the claims above and are rejected by Miyazawa for the foregoing reasons.

***Allowable Subject Matter***

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: evaluating the performance of the function and adjusting it is not taught by Miyazawa.

***Response to Arguments***

Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D Abebe whose telephone number is 571-272-7615. The examiner can normally be reached on monday-friday.
